Paraná, ER
July/2021 – October/2021

- Manage design, flyers, and advertising.
- Estimate the required resources and time.
- Develop and implement a plan and processes for the project.

Relevant Project

Universidad Tecnológica Nacional

C# WinForms Developer

Fall 2023

- We have developed a desktop application using WinForms designed to efficiently manage reservations for properties and temporary rentals.
- The application includes statistical graphs that provide detailed information on the percentage of reservations based on the type of accommodation and the number of reservations categorized by the number of guests.
- Key features include:
 - Listing, addition, modification, and deletion of properties.
 - Inquiry, printing, import, and export of reservations.
- System persistence is ensured through the use of binary serialization.
- We provide accommodation search tools, allowing users to apply filters and specific features.
- To enhance the user experience, we have developed a help website that provides detailed information about the program and its operation.

Skills

Languages: C#, JavaScript.

Frameworks: .NET, WinForms, Node.js, Express, React.

Technologies: Git, GitHub, SQL Server, MySQL, MongoDB (Mongoose), HTML/CSS (Bootstrap, Tailwind).
